## Part 1. Introduction to Quality Companion Dashboard

---

---

Quality Companion by Minitab® provides everything you need to manage your quality improvement projects in one application. The included Quality Companion Dashboard makes it easy to assess the status of your entire Six Sigma program by aggregating all of your projects into a single, summary view. You can quickly see and share the project data most important for your entire program. You can even open Quality Companion projects from the Dashboard and manage all of your tasks across every project. Quality Companion and the Dashboard help you attain the maximum benefit from your quality improvement program.

## Part 2. What's New

---

---

### Quality Companion Dashboard 3.4.3

- Compatible with Quality Companion 3.3 project files.

### Quality Companion Dashboard 3.1.0

- Faster scan for project files across local and networked servers.
- Project file scans can be cancelled.
- The Summary section is now customizable.
- Quality Companion custom data may be displayed in the Dashboard.
- You can import and export Look In, Filter, Summary, and Column configuration settings.
- You can export summarized data into tab- or comma-delimited files.
- Quality Companion tasks can be viewed directly within the Dashboard.

---

---

## Part 3. Known Problems and Workarounds

---

---

- If you are using the Simplified Chinese IME on a computer running the English XP operating system and you select a date from the date picker in the Filter window, the date picker calendar display and the input row date display are incorrect. (136041)
- Images in rich text fields may not display correctly in Project list columns (145928)

- A file stored in SharePoint® will not be checked out when opened. This could allow multiple users to edit the project simultaneously and overwrite each other's changes. (132124)
- The Dashboard does not currently support authentication. Therefore, if you are using Microsoft Vista®, you cannot access files stored in SharePoint. (131431)
