# Minitab ▷®

Are you ready for the next era of data-driven problem solving?

For over 50 years, Minitab has helped companies identify trends, solve problems, and discover valuable insights in data. Times are changing and so are we.

Meet the Minitab Solution Center – A One Stop Shop for Analytics and Problem Solving in the Cloud

Minitab users can access a comprehensive set of capabilities in one place, designate their own data repository within their organization, and benefit from streamlined data acquisition and preparation — all in the cloud. Learn more:

Minitab Statistical Software:

Minitab's market-leading statistical engine is available both via Minitab Statistical Software and throughout the Minitab Solution Center.

Minitab Workspace:

Infuses quality into your processes with powerful visual tools, process maps, brainstorming diagrams and forms. Form processes, identify opportunities, and solve problems faster and easier than ever before.

Minitab Data Center:

Minitab Data Center combines conversational AI with intuitive visualizations to help you quickly turn prepped data into impactful insights. Experience a seamless workflow to load, visualize, and prepare your data with:

- A Data Grid
- Preparation Steps
- Column Metrics

Minitab Brainstorm:

Users can access pre-built brainstorming templates, including Minitab's most advanced and visually impressive fishbone diagrams to date. AI-enhanced brainstorming accelerates idea generation empowering smarter, data-driven decisions for every team.

Minitab Dashboards:

Instantly generate smart, ready-to-use dashboards in one click that transform your data into direction with no manual setup required. It includes all the powerful visualizations available in Graph Builder as well as most control charts and process capability tools to explore and analyze process data.

Minitab AI*:

Minitab AI delivers natural language summaries of your statistical analyses, enabling you to understand your results and take action with confidence. As the Minitab Solution Center grows, Minitab AI will continue to expand by integrating advanced generative AI capabilities that further enhance your analytical experience.

Access to Minitab Solutions:

The Minitab Solution Center also provides users access to a multitude of additional capabilities like data access and integration, predictive analytics, continuing education, project management, discrete event simulation, business process mining, digital twin, model deployment, real-time statistical process control and both industry focused and functional area modules.

Organizations can opt-out of leveraging this solution if its internal policies don't allow them to use it

We hope you are ready for the next era of data-driven decision making.
Join us – it's going to be an exciting ride!
