

Minitab Connect® August Release

Maintenance Items in Minitab Connect August Release

- Updated the Connect Snowflake Connector API. This update strengthens MFA requirements and eliminates the ability for users to log in with username/password alone.

Bug Resolution in Minitab Connect August Release

- Resolved an issue in which alpha-numeric values appear as scientific notation automatically formatted to large numbers.
- Resolved an issue in which some Dashboard Capa type alerts could incorrectly be triggered after table data updates.
- Resolved an issue in which Excel imports included commas in any number with greater than four digits.
- Resolved an issue in which form web exports configured with restricted tokens would trigger 404 errors.
