Minitab Connect® November Release

1. New Features in Minitab Connect November Release

Update Splash Screen

The November release contains a simplified splash screen to align with the other Minitab products. This creates a cleaner and more consistent user experience.

2. Maintenance Items in Minitab Connect November Release

Snowflake Update

Snowflake will phase out user/password authentication in November 2025, which could cause our current connector to stop working. To stay ahead of this change, we upgraded the connector to use key/pair authentication. This ensures uninterrupted data access and alignment with Snowflake's enhanced security standards.

Sunsetting Connectors

The following connectors will be sunset for customers who are not currently using them:

- LinkedIn
- Google Search Ads 360
- Report
- Google DCM
- Critical Impact
- Google Ads
- Tik Tok
- Centro Basis
- Mail Chimp

3. Problems Resolved in Minitab Connect November Release

The following issues are resolved in Minitab Connect November Release

- Dashboard asset not loading before page change and Date slicer config not stored. (307382)
