Minitab Connect® 7.10.2

Table of Contents

1. New Features in Minitab Connect 7.10.2

- RestAPI Auth – JWT Bearer
    - This feature enables users to securely authenticate API requests by generating and adding JWT tokens using the Connect Rest API Connector. Users can select one of three encryption methods: HS, RS, or ES, for enhanced security and flexibility.

- API Documentation
    - Use the new API Documentation to view and test commonly used Minitab Connect API endpoints that can be integrated within other external systems.
    - Minitab Connect has always been positioned as an integration resource for bringing data into the Minitab ecosystem. With the newly added API Documentation, we are making it easier for organizations to leverage their Minitab Connect subscription information within other external systems and processes.
