

# Real-Time SPC™ February 2026

## New Features in Real-Time SPC February 2026

### **Net Content Reporting Additions**

The following enhancements improve the monitoring of Net Content specifications in Real-Time SPC:

- Display of net content limits (LMAV, UMAV, LT1, UT1, LT2, UT2) on I-MR charts in both the Station Dashboard and Process Quality Snapshot.
- Net content limit lines can be toggled on or off using the *Show all specification limits* menu option in both the Station Dashboard and Process Quality Snapshot.
- Summary statistics for % Overfill and Measure Averages for measures are available on the control charts within the Product Quality Snapshot.
- Net Content columns are now included in the Current Performance Summary.

### **“What’s New” Carousel**

A “What’s New” carousel is shown the first time a user launches the app after a release, highlighting new functionality.
