Real-Time SPC™ 7.10.8

Table of Contents

1. New Features in Real-Time SPC 7.10.8

Operator Dashboard Enhancement
Allows the operator to narrow the list of data collections to selected products and processes currently in production, by station. Overall, this comprehensive dashboard, which can be organized by station or schedule, provides easily accessible information to operators responsible for collections.

2. Problems Resolved in Real-Time SPC 7.10.8

The following issues are resolved in Real-Time SPC 7.10.8:

- Connect tables and views not available when setting up data sources. (295192)
