

Real-Time SPC™ August 2026

Release Date: August 2026

New Features in Real-Time SPC, August 2026

Automated Component Setup (ACS) Sampling Plan Enhancements

Use enhanced ACS functionality to create, group and revise measures within Sampling Plans. This helps to significantly reduce the time spent creating and revising products within the system.

Operator Dashboard Exception Enhancements

Quickly identify and take corrective action on out-of-spec or out-of-control events through enhanced indicators in the Operator Dashboard. Select any indicator to jump directly to the Station Dashboard to take any action required.
