

Are You Using a Project Management System or Solution?

Leaders and managers prioritize ideas and projects based on the impact they will have on their organization. They might use a homegrown system to manage their continuous improvement efforts, which often doesn't provide a full view of the impact of their initiatives. Luckily, Minitab has the ultimate end-to-end idea and project management solution: **Minitab Engage**.

Minitab Engage provides CI and OPEX programs with the ability to manage the entire lifecycle of a project on a single application. Engage empowers teams to create an automated process tailored to their needs, while aggregating vital details of existing projects, collecting, and vetting ideas for new ones, while improving productivity and efficiency.

End-to-End Idea & Project Management Solution

<p>Improve project manager productivity</p> 	<p>Collect more, higher quality ideas</p> 	<p>Improve project execution, productivity & efficiency</p> 	<p>Utilize an end-to-end platform built on improvements</p> 
<ul style="list-style-type: none"> • Less time to set up projects: Templatize the process of starting a new project with the most comprehensive set of pre-built forms, smart tools, and project roadmaps designed specifically for CI/OPEX professionals. • Less time managing emails: Track the status of each project and receive notifications when certain stages are completed. • Less time reviewing projects: All work is documented and saved in one file. Managers can map out which steps to take, tools/forms to use, and data to collect, resulting in fewer surprises. • Less time aggregating data and generating reports: Automate collection of project data and dashboards that update in real-time. 	<ul style="list-style-type: none"> • Collect ideas for improvement across your entire organization. • Evaluate ideas based on alignment with strategy. • Forecast project budget, duration, and expected value with increased accuracy using Monte Carlo simulation. • Optimize project selection to maximize expected return on investment. 	<ul style="list-style-type: none"> • Roadmaps to organize and guide projects: Determine which problem-solving methods/tools drive successful project outcomes, and standardize across the entire team. • Notifications and phase reviews: Keep projects from falling behind. • Integration of smart tools: Easily access, create, and edit process maps, flow charts, value stream maps on one application. • Collaborate on projects: All team members can access a project file, reducing time spent on handoffs, and minimizing risk of version duplications. • Centralized data repository and search feature. Learn from past work and share best practices. 	<ul style="list-style-type: none"> • Document and track projects from start to finish: Know what worked and what did not, replicate success, identify areas for improvement, and share best practices.

Let our end-to-end idea and project management solution help you achieve success with your initiatives.
