

SIMUL8

Simul8 Deployment

Simul8 Deployment

Simul8 deployment is delivered through two structured levels: Level 1 and Level 2. Deployment includes software setup, onboarding, initial training, and support to apply simulation to real business challenges. Unlike training, which focuses on certification, deployment is designed to deliver measurable value within 4–8 weeks while building a foundation for long-term adoption.

From the outset, we work with you to define your goals, understand your processes, and identify where simulation can deliver the greatest impact. Our consultants then guide you through a proven deployment approach, ensuring alignment between your objectives, your models, and your outcomes.

Working together, we help you accelerate time to value while building the internal capability needed to sustain and scale simulation across your organization.

‘A proven deployment approach, ensuring alignment between your objectives, your models, and your outcomes.’

Deployment Approach

A typical Simul8 deployment follows a structured, collaborative path:

1. Discover & Define

Start by aligning on your goals and understanding how simulation fits your needs. You'll be introduced to Simul8's capabilities and explore what success looks like for your organization.

2. Consult & Choose

Work with our team to identify the right configuration and deployment level. We'll recommend the best approach and guide you through purchase and setup decisions.

3. Deploy & Configure

Once confirmed, we'll set up your Simul8 subscription and provide access. This ensures everything is ready for a smooth and efficient start.

4. Introduction & Understanding

Meet your Minitab simulation consultant team to set the foundation for success. In this session, we:

- Align on your goals and desired outcomes
- Understand your learning style and preferred pace
- Define timelines and key milestones. This ensures your deployment is tailored, structured, and set up to deliver value from the start.

5. The Art of Simulation

Before building, we focus on thinking like a simulation expert. You'll learn how to:

- Clearly frame your simulation problem
- Identify and prepare the right data inputs
- Communicate effectively with stakeholders
- Set expectations throughout the simulation journey

This step is critical. It ensures your project is meaningful, credible, and actionable.

6. Readiness Workshops (Build Your Capability)

Based on your goals, the Minitab simulation consultant team will recommend targeted training workshops. These sessions guide you through:

- Building your simulation model step by step
- Applying best practices in Simul8
- Developing confidence in using the software independently

This is where your project begins to take shape and deliver real insight.

7. Advanced Development & Ongoing Growth (Level 2)

For teams continuing to Level 2, your journey expands with deeper expertise:

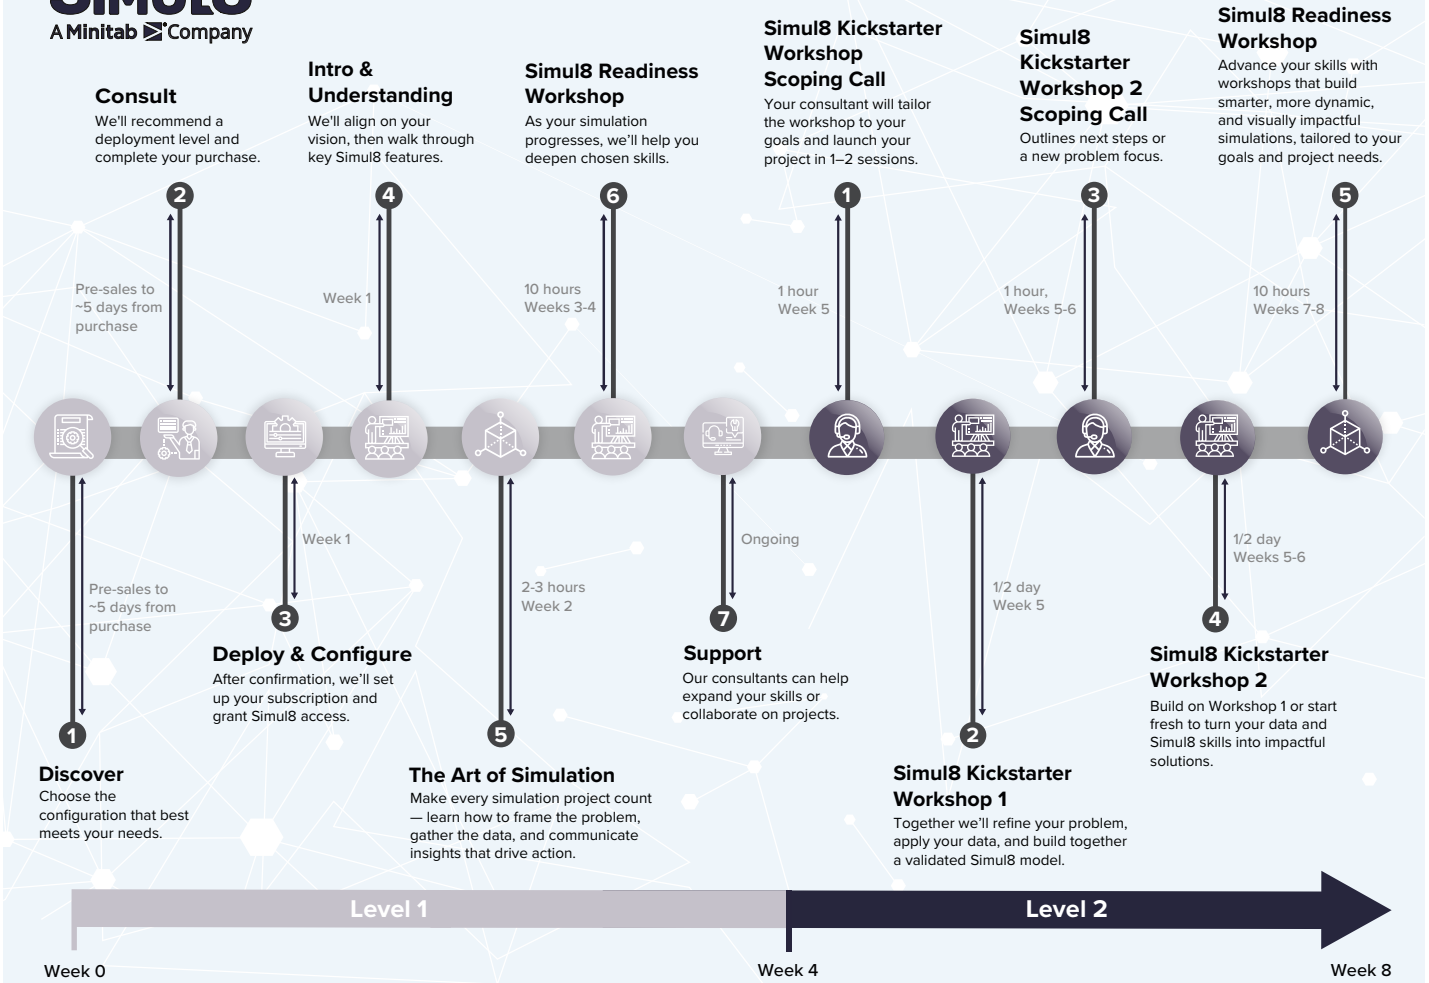

- A full-day advanced workshop to accelerate your skills or focus on building your simulation project together
- Additional readiness workshops focused on advanced Simul8 topics
- Continued development of more complex, high-impact models

Alongside this, you'll continue to receive expert support to refine models and expand your simulation capability over time.

SIMUL8

A Minitab Company

Deployment Options

Level 1 Deployment

Fast-track your team's success with guided setup and foundational support. Ideal for teams looking to get up and running quickly with simulation.

Level 2 Deployment

A more in-depth engagement focused on your specific processes and goals. Build simulation models tailored to your organization while developing internal expertise.

Both options are designed to accelerate learning, streamline setup, and ensure your team focuses on the simulation topics that matter most.

What We Will Do for You

- Guide you through deployment planning and setup
- Collaborate on building simulation models using your process knowledge
- Provide expert recommendations and best practices
- Support testing, validation, and refinement of models
- Deliver hands-on training aligned to your use case
- Help you generate insights to support better decisions
- Enable your team to confidently use simulation moving forward

Outcome

By the end of your deployment, you'll have the confidence and capability to apply simulation as a practical decision-making tool within your organization. From clearly defining problems and working with the right data to building credible models and communicating insights with impact, your team will be equipped to drive meaningful change. With the support of Minitab's simulation experts, you'll be able to scale your use of Simul8, unlock new opportunities, and embed simulation as a core part of how you improve processes and make better, faster decisions.
